PUBLICATION OF THE PATENT OFFICE

INTRODUCTION

In view of the recent amendment made in the Patents Act, 1970 by the Patents (Amendment) Act, 2005 effective from 01st January 2005, the Official Journal of The Patent Office is required to be published under the Statute. This Journal is being published on weekly basis on every Friday covering the various proceedings on Patents as required according to the provision of Section 145 of the Patents Act 1970. All the enquiries on this Official Journal and other information as required by the public should be addressed to the Controller General of Patents, Designs & Trade Marks. Suggestions and comments are requested from all quarters so that the content can be enriched.

(12) PATENT APPLICATION PUBLICATION

(21) Application No.202611057026 A

(19) INDIA

(22) Date of filing of Application :05/05/2026

(43) Publication Date : 17/07/2026

(54) Title of the invention : A SYSTEM FOR ADAPTIVE AI-BASED EMPLOYABILITY FORECASTING AND SCENARIO SIMULATION

(51) International classification	:G06Q 10/06, G06Q 10/04, G06N 20/00, G06Q 10/00, G06N 5/02	(71) Name of Applicant : 1)Vivekananda Institute of Professional Studies - Technical Campus Address of Applicant :AU Block, Outer Ring Road, Pitam Pura, New Delhi, Delhi-110034, India New Delhi Delhi India
(31) Priority Document No	:NA	(72) Name of Inventor :
(32) Priority Date	:NA	1)Vansh Grover
(33) Name of priority country	:NA	2)Navya Jain
(86) International Application No	:	3)Abhishek Prasad
Filing Date	:01/01/1900	4)Dr. Updesh Kumar Jaiswal
(87) International Publication No	: NA	
(61) Patent of Addition to Application Number	:NA	
Filing Date	:NA	
(62) Divisional to Application Number	:NA	
Filing Date	:NA	

(57) Abstract :

The invention relates to adaptive AI-based forecasting in workforce analytics and provides a system comprising a data ingestion module for extracting macroeconomic, human-capital, ICT, innovation and automation-risk time-series; a data pre-processing module for cleansing and normalizing features; an adaptive factor weighting module computing dynamic weights; an employability score aggregator generating a composite employability index; a forecasting engine for predicting future employability trends; an explanation module providing insights into contributing factors; a scenario simulation module for generating alternative projections based on input changes; a report generation module for producing narrative summaries; and a visualization interface for interactive dashboards.
